📍 Based in France | Open to Relocation

SUMMARY

Android Software Engineer with **4+ years of experience** building and modernizing production applications across fintech and consumer products. Specializes in Kotlin, Jetpack Compose, and modular architecture to deliver **reliable, maintainable applications**, modernize legacy codebases, and enable faster, safer releases. Brings **end-to-end ownership** across technical design, feature development, performance optimization, release, and post-launch support.

WORK EXPERIENCE

Android Software Engineer, Hamsaia Apr 2026 – Present | Sweden (Remote)

Cross-border e-commerce platform helping customers abroad purchase and deliver everyday essentials to their families.

- **Owned the end-to-end delivery** of Hamsaia's Android application, taking it from initial architecture and development to a **Google Play launch within four months**.
- Defined the technology stack and built a **modular Kotlin Multiplatform codebase** using Kotlin, Jetpack Compose, Clean Architecture, and MVVM/MVI, delivering **10+ production screens and core commerce flows** across product discovery, cart, checkout, and payments.
- Strengthened production readiness by refactoring the beta codebase and introducing structured logging and crash monitoring, **reducing build time by approximately 10% and lowering the observed crash rate by approximately 5%**, while supporting reliable releases and post-launch stability.

Android Software Engineer, Gandom Company Sep 2023 – Dec 2025 | Tehran

Fintech company operating brokerage, investment, and financial-content platforms serving approximately 5 million users.

- Developed and modernized **four production Android applications** within a high-volume financial ecosystem handling **4–6 million daily financial transactions, API requests and market-data operations**.
- Modernized **two legacy Java/XML applications** by migrating them from MVP and outdated networking implementations to Kotlin, Jetpack Compose, Clean Architecture, MVVM/MVI, Coroutines, and Flow, **approximately doubling overall application performance, reducing crashes by 40%, and decreasing application size by 20%**.
- **Independently designed and delivered** an investment-fund analytics application within four months, including **20+ feature areas, six interactive financial chart types, and a configurable market treemap**, using Kotlin, Room, Paging 3, MPAndroidChart, and AnyChart.

Android Engineer, TrueLearn Mar 2023 – Aug 2023 | Tehran

EdTech company developing digital learning products across professional and technical fields.

- Contributed to the **architecture and delivery of multiple Android products**, working from project setup and technical design through feature implementation using Kotlin, Jetpack Compose, modular MVVM, Clean Architecture, Coroutines, Flow, Hilt, Room, and Retrofit.
- Delivered **end-to-end user flows** covering REST API integration, authentication, local data handling, navigation, localization, and responsive UI, while contributing to **architecture decisions, code reviews, and shared engineering standards**.

Mobile Software Engineer, Tagfaa

Sep 2022 – Mar 2023 | Shiraz

Software development company delivering mobile, web, automation, and integrated solutions for business clients.

- Developed **native Android and iOS applications** for an enterprise customer-service platform supporting a logistics client with **300,000+ customers**, using Kotlin and Swift.
- Delivered **secure account management and shipment-tracking workflows**, including authentication, session management, paginated service history, search and filtering, status timelines, financial visualizations, notifications, and multimedia playback, using MVVM/Repository architecture, Retrofit, Paging 3, Firebase Cloud Messaging, ExoPlayer, AVKit, SwiftUI, and async/await.

Software Engineer Intern, uMind

Mar 2022 – Sep 2022 | Shiraz

*AI-assisted mental-health platform providing personalized mood and habit support to approximately **500 users**.*

- Developed **mood- and habit-tracking features in Flutter** and integrated them with a trained conversational model to provide personalized responses and well-being guidance based on user input.
- Contributed to the **Django REST backend** by implementing REST APIs, authentication, database models, business logic, and administrative functionality using Django, PostgreSQL, and MongoDB, while collaborating across mobile, backend, and AI teams.

TEACHING & LEADERSHIP

Head Teaching Assistant & Android Workshop Instructor

Sep 2021 – Sep 2025 (Multiple Appointments)

Shiraz University

- Mentored **100+ students** across Android Programming, Software Design, HCI, OOP, and Programming Fundamentals through technical labs, coding sessions, and project reviews; led teaching-assistant teams and coordinated assignments, course projects, and examinations.
- Delivered **two Android and Kotlin workshops**, including a **12-hour workshop for approximately 70 participants**, covering Kotlin fundamentals, modern Android development, and Jetpack Compose.

SKILLS

Languages & Cross-Platform: Kotlin, Java, Kotlin Multiplatform (KMP)

Android & UI: Android SDK, Jetpack Compose, XML Views, Material 3, Navigation Compose, Adaptive UI, Accessibility

Architecture & Dependency Injection: MVVM, MVI, Clean Architecture, Modularization, Multi-module Architecture, Hilt, Koin

Concurrency, Networking & Data: Coroutines, Flow, RxJava, Retrofit, OkHttp, Ktor, REST APIs, GraphQL, WebSockets, SSE, Room, DataStore, Paging 3, Offline-first Architecture

Testing: Unit Testing, Integration Testing, UI Testing, JUnit, MockK, Mockito, Espresso, Compose UI Testing

Build, CI/CD & Release: Gradle Kotlin DSL, Version Catalogs, Git, GitHub Actions, GitLab CI, Jenkins, Google Play Console, AAB, App Signing

Performance & Monitoring: Android Profiler, Perfetto, ANR Investigation, Memory Leak Analysis, Firebase Crashlytics, Sentry

Security: Android Keystore, Encrypted Storage, SSL Pinning, OAuth 2.0, JWT, Biometric Authentication, ProGuard/R8

EDUCATION

Bachelor of Science in Computer Science and Engineering, Shiraz University

Nov 2020 – Jan 2025 | Shiraz
